Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 October 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claims 1-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 1003.

Applicant's election without traverse of Group III (claims 14-27) in Paper No. 1003 is acknowledged.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wada et al.(5,100,922) in view of Olstowski et al.(3,753,933) and Smits et al.(5,250,579).

Wada et al. discloses preparations of polyurethane foams wherein an isocyanate reactive component containing polyols, crosslinkers, catalysts, blowing agents, and other agents and additives are combined with an isocyanate component in a mold to obtain polyurethane foamed articles, and, particularly, integral-skin polyurethane foam articles. (see columns 7 and 8 and the examples, as well as, the entire document). Wada et al. differs from the claims in that the specific polymer additives of the claims are not specifically recited by their disclosure. However, Olstowski et al. discloses the arts recognition of the employment of polyethylene powders and fluorinated polymers as

additives in the preparation of polyurethane foams, and Smits et al. discloses the employment of PTFE, particularly, in polyurethane foam synthesis. Accordingly, it would have been obvious for one having ordinary skill in the art to have employed the additive polyethylene and PTFE polymer powders disclosed by Olstowski et al. and Smits et al. in the preparations of Wada et al. for the purpose of imparting their processing and property modifying effects in order to arrive at the products and processes of applicants' claims with the expectation of success in the absence of a showing of new or unexpected results.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bruchmann et al. is cited for its disclosure (column 2 lines 49-56) of the use of polyethylene and PTFE as mechanical property modifiers in the related arts.
